Product Description

Centrix is a Graphical Replay & Fault Prevention system targeted at Railway Infrastructure Maintainers.

USPs

- 100% web-based - access the system from virtually anywhere at anytime
- User editable, drag-n-drop replay maps - no need to pay huge fees to create/update maps
- Fault detection alerts - preset conditions can trigger e-mail alerts as soon as the fault is detected

Feature List

- **Interlocking & level-crossing graphical replay**
 - Web-based replay
 - User editable, drag-n-drop map designer
 - Concise listing of all monitored relays
 - Logic analyser widget to confirm sequencing and timing
 - Create bookmarks to quickly navigate back to an incident
- **Fault detect & alerts**
 - Find & Fix - Get alerted to faults and incidents as soon as they occur
 - Predict & Prevent - Spot asset deterioration and fix before failure
 - Powerful e-mail alert notification schemes to keep you in control of alert frequency
 - Add scheduled or repeating maintenance periods to automatically suppress alerts for selected assets
- **Analogue & points trace replay**
 - Add replay and analysis of all manner of analogue data sources into your sites
 - Display and overlay multiple analogue input channels on a single graph
 - Mark baseline trace(s) to see degradation since maintenance/installation
