

# Event Sources

Event information processed by Centrix is collected from various sources.

## Hour File

The hour file is a format used by the SA380 and SA380 TX series loggers for the storage of digital event data.

```

```

## MIMOSA XML

The MIMOSA XML format is used by the SA380 TX and SA380 TXL series loggers for the communication of event data. This is the format used by the Network Rail Intelligent Infrastructure (II) system.
