

Centrix R27 Release Notes

Sequence Timing Report

The SIN/137 report has been generalised to make it useful for timing all kinds of event sequences - e.g. barrier raise times. It also now allows exporting the raw timing data in a CSV format.

Download Current Hour File

Dialled loggers can now be configured to always download the latest incomplete hour file (for the current hour) rather than only fetching the latest complete file.

The screenshot shows the 'Edit Site' dialog box with the 'Logger' tab selected. The 'Add Logger' button is visible in the top right. The configuration fields are as follows:

- Logger Type: SA380 (dropdown)
- Enabled:
- Logger Name: 1094 TEMP (text field)
- Phone Number: 9107825376555 (text field)
- Provider (SIM): GC (dropdown)
- Start Polling: Mon (dropdown), 6 (spin box), 5 (spin box)
- Then Every: day (dropdown)
- Actions:
 - Ping logger
 - Set system time (2am-5am)
 - Download hour files
 - Check system log
 - Download current hour file

At the bottom, there are 'OK' and 'Cancel' buttons.
